#### **DETAILED ACTION**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 09/13/2004 has been entered.

### Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-3 and 6-15 are rejected under 35 U.S.C. 102(e) as being anticipated by An et al. (An) (U.S.Patent No. 6,392,724).

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in

Art Unit: 2871

the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

As to claims 1, 2 and 6: An discloses a liquid crystal module having improved fixing structure comprising optical sheets (145, 146) included in a backlight assembly (140) (col. 5, lines 7-13), a main frame (132) mounted with the backlight assembly, a shaft member (172, protrusion) installed at the main frame (132) to fix the optical sheets (col. 6, lines 24-31). An also discloses a panel guide (170, fixing unit) engaged in the shaft member (172) for surrounding the backlight assembly (140) and the main frame (132) (Fig. 4). An also discloses that the optical sheets having holes (178) (col. 6, lines 26-28).

As to claim 3: An discloses that the main frame (132) is provided with a stepped hole (138)

As to claims 7-10 and 12-14: An discloses that the shaft member (172) has a protrusion (col. 6, line 26) having a width smaller than the width of the shaft member (Fig. 4), as recited in instant claims 7 and 12. The extension of the protrusion through the holes in the optical sheets is shown in Fig. 4 and (col. 6, lines 26-28), as recited in instant claim 8. The protrusion has a circular cross-section and the holes have a circular shape (Fig. 4), as recited in instant claims 10 and 14 and the matching shape of the holes and the protrusion can be seen from Fig. 4, as recited in instant claims 9 and 13.

Art Unit: 2871

As to claims 11 and 15: An discloses that the panel guide (170) has a hole (178) formed therein through which the protrusion (172) extends (Fig. 4) and (col. 5, lines 51-55).

# Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over An in view of Ha et al. (Ha) (U.S.Patent No. 6,166,788).

As to claims 4 and 5: An teaches all the recited limitations of claim 1, except An does not teach silicon pad on the optical sheets or a hole in the pad.

Ha in disclosing a display module having a LCD panel attached to front housing, teaches the use of a silicon spacer (162, pad) (col. 8, lines 54-58) and Fig. 9. When attached to the module as shown in Fig. 5, the silicon pad (162) is in between the flange (62) and the optical sheets (5-7). Since the flange (62) has a hole as shown in Fig. 5 and a bolt (47) is placed to fix the optical sheets and the rest of the assembly together, the silicon pad has a hole also as shown in Figs. 5 and 9.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to adapt the silicon spacer (pad) to limit

Art Unit: 2871

the up and down movements of the light guide assembly (5-7) (col. 8, lines 59-61).

# Response to Arguments

6. Applicant's arguments with respect to claims 1-15 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Prasad R Akkapeddi whose telephone number is 571-272-2285. The examiner can normally be reached on 7:00AM to 5:30PM M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert H Kim can be reached on 571-272-2293. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
